

FELIPPE XIMENES

Full-Stack Developer | AI & LLM Engineering (RAG, GenAI)

felippelpximenas@outlook.com | +55 21 99625-9529 | Rio de Janeiro, Brazil |

linkedin.com/in/felippeximenas | github.com/felippeximenas

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience delivering production LLM applications, RAG (Retrieval-Augmented Generation) pipelines, and workflow automations for remote, international teams. Proven track record of independently leading projects end-to-end — from architecture to deployment — across web applications, vector search systems, no-code/low-code automations, and data dashboards. Proficient in Python, TypeScript/JavaScript, and cloud-native stacks such as AWS, Amazon Bedrock, and Azure OpenAI, with direct experience deploying LLMs to production and applying MLOps fundamentals. Comfortable working within multicultural, English-speaking remote teams and translating technical work for non-technical stakeholders.

CORE COMPETENCIES

End-to-End Full-Stack Development • RAG Pipeline Design • Vector Search & Semantic Retrieval • LLM Integration & Deployment • Cloud-Native & Serverless Architecture • Workflow Automation & Third-Party Integrations

PROFESSIONAL EXPERIENCE

Web Developer • Neocoder

April 2026 - Present

Building and maintaining web solutions and internal automations within the company's no-code/low-code toolset, acting as both developer and operations owner. Developed AI-driven automations with n8n, integrating intelligent agents into internal workflows, and connected CRM/data pipelines via Make (Integromat) into automated Notion dashboards. Integrated web forms with Pipedrive for lead capture and qualification, and monitored site uptime and performance.

Junior Full Stack Developer • Zosia AI Assistant

October 2025 - Present

Full-stack contributor to Zosia, a pro-bono, open-source conversational AI assistant that simplifies access to Polish social security (ZUS) benefits, working within a multicultural, English-speaking remote team. Migrated a mocked system to a production-ready RAG pipeline (FastAPI/Python) with real vector embeddings and semantic search on PostgreSQL/Neon via PGVector, and LLM-generated responses via Ollama and Azure OpenAI. Built a fallback strategy so the assistant keeps returning contextual answers even if the LLM call fails, ensuring zero downtime. Built backend APIs with NestJS/Fastify (validation, rate limiting, Kubernetes health checks) and developed the frontend in Angular 17 + Angular Material, plus E2E test suites covering the full RAG pipeline.

Freelance Full Stack Developer • Self-Employed

June 2024 - November 2025

Delivered responsive websites and web applications end-to-end for small-business clients, from UI to deployment. Built a full CRM integration with Pipedrive via serverless Netlify Functions, automatically creating contacts and deals from form submissions, and implemented GTM + GA4 tracking. Managed deployments and CI/CD pipelines on Netlify, including environment variables and branching strategy.

Bilingual Ticket Agent • Corcovado Train

December 2022 - July 2024

Provided multilingual service (Portuguese, English, Spanish) to international visitors and operated database-driven ticketing and payment systems in a high-volume, time-critical environment.

PROJECTS

Certara — AI-Powered AWS Certification Prep Platform

Independently designed and built a quiz platform for AWS certification prep featuring AI-generated questions and personalized feedback. Stack: AWS Lambda, API Gateway, AWS SAM, Amazon Bedrock (Nova Pro), Qdrant, Cognito, DynamoDB, Stripe, React + TypeScript, Zustand, Tailwind CSS.

GitHub: github.com/felippeximenes/certara-app

EduTrack — Full-Stack Learning Management System (LMS)

Role-based access control system. Stack: Node.js/Express/TypeScript, Prisma ORM + MySQL, React 19, JWT, Vercel, and Railway. Features: course management, progress tracking, automatic PDF certificate generation with QR-code verification via Playwright.

GitHub: github.com/felippeximenes/edu-track

LiberPay Dashboard

Next.js dashboard consolidating GA4, Pipedrive, and MailPoet data into a weekly sales funnel view. Stack: Next.js, Vercel Blob, Make.com automation. Features: week-over-week comparison and PDF/CSV export.

GitHub: github.com/felippeximenes/liberpay-dashboard

EDUCATION

Systems Analysis and Development — UFBRA

Technical Degree • In Progress

Data Engineering — Alura

Professional Program • Dec 2024 - Dec 2025

SKILLS

Technical: Python • JavaScript • TypeScript • SQL • RAG pipelines • vector search (PGVector, Qdrant) • Amazon Bedrock • Ollama • Azure OpenAI • production LLM deployment • prompt engineering • MLOps fundamentals • React • Angular • Next.js • Vite • HTML5 • CSS3 • Tailwind CSS • responsive design • Node.js • NestJS • Express • FastAPI • REST APIs • serverless functions (AWS Lambda, Netlify Functions) • AWS (Lambda, API Gateway, Cognito, DynamoDB, SAM/CloudFormation) • Railway • Git/GitHub • CI/CD • PostgreSQL • MySQL • MongoDB • Prisma ORM • vector databases • Make.com (Integromat) • n8n • Pipedrive API • webhooks • GTM/GA4 • end-to-end testing (Playwright) • code review • technical documentation • Agile practices (Scrum) • multicultural remote work • stakeholder communication.

Tools: Vercel • Netlify • Docker • Git • GitHub

LANGUAGES

Portuguese • Native
English • Fluent
Spanish • Advanced

CERTIFICATIONS

Data Science – Level 3 • Alura (Dec 2025)
Data Science – Level 2 • Alura (Nov 2025)
MongoDB – NoSQL Database • Alura
Data Pipelines with Python • Alura
